THE MICROSCOPE

SUBJECT INDEX

VOLUME 44

100 Years Ago, 98
μ, loss of, 173
Accessories for PLM, 163
Acetolysis, 87
Acid, reaction with squaric acid, 8
Acids, microchemical test, 110
Aggregates, 17
Air lines in glass, 4, 24, 30
Air samples of GSR, 12
Air surface devitrification, 31, 43
Airborne lead concentrations, 11
Airborne pollen, 82
Alcohols, microchemical test, 112
Aldehydes, microchemical test, 108
Algae, 3, 54
American Gothic, 164
Ammunition, 11
Amplitude contrast, 58
Antimony, 11
Aroclor 5442, 10
Arsenic, microchemical test, 108
Asbestos, TEM proficiency, 160
Asbestos quantitation, 160, 163
ASTM Standard E2, 71
Atmospheric micro experiments, 152
Automotive paint-finish defects, 151
AZS refractories, 34, 39, 43
BAR, 157
Barium, 11
Batch stones in glass, 25
Bausch & Lomb metallograph, 151
Bausch & Lomb Model L, 65
Bentley, Wilson, 163
Bipyramidal crystals, 8
Bird diseases, 151
Birdman of Alcatraz, 151
Birefringence of fibers, 155
Bituminous oil examination, 141
Blind Chemist's Society, *iii* (Vol. 44:1)
Blisters in glass, 24, 30, 33
Bloss Automated Refractometer, 157
Bonded AZS, 39
Borosilicate glass defects, 23
Brick fragments, rundown and spall, 34
BSE, 168
Bubbles, 30, 43
Bulk sample proficiency testing, 161
Bunsen flame, 15
Cadmium format, characterization and identification, 150
Calcite, 13
Calibration grid, 175
Camera length calibration, 175
Cane, 43
Carbohydrates, microchemical test, 109
Carbon, microchemical tests, 106
Carbon-dating, 122
Carbonate anions, 203
Carnegieite, 34
Cartooning, 57
CCI Blazer ammunition, 11
Characterization and identification, cadmium formate, 150
Charcoal, 1, 5
Chelsea filter, 12
Chemical microscopy, *iii* Vol. 44:3,7
Chemical stress cracking, polymers, 156
Chloride, 205
Christ among the doctors, 119
Chromic oxide, 35
Chrysotile, 175
Cobalt blue, 12
Cocaine in currency, 165
Compensator, precision universal, 159
Compressive defects in glass, 24
Condenser brightfield illumination systems, 60
Confocal microscopy, 156
Contrast, 15
Cords in glass, 24, 43
Cornea, 99
Corundum, 34, 150
Coverslip gripper, particle crusher, and disperser, 10
Crack cocaine, 165
Cristobalite, 31
Crocidolite, 175
Crossection alternatives, 156
Crystal lattice strain, 153
Crystal symmetry, 151

Crystalline condensates in glass, 24
Crystalline inclusions in glass, 28
Cullet, 43
Cyclic twins, 8
Dating of pigment use, 120
Decomposition of substances, 107
Dendritic zirconia, 34
Density separation of soil, 84
Devitrification, 25, 43
Devitrified glass, 31
Diatoms, 3
Diffraction lines, 105
Diffuse light source, 60
Digital camera performance, 152
Digital imaging, 51
Digital microscopy, 158
Dispersion staining, 164
Double condenser illuminator, 72
Drip, 43
Dry mounts, 155, 207
ECO-SEM, 168
Editorial, *ii* (Vols. 1-4)
Efficiency of mineral analysis, 166
Electron back-scattered pattern, 155
Electron microprobe/PLM, 157
Enhancing surfaces, 15
EPA SW846 Method 8081, 2
Ergonomics of microscope design, 152
Esters, microchemical test, 112
Evaporation control, (compressor cell), 141
Fabric, 17
Failure analysis in polymers, 156
False Becke line, 8
Federal Ammunition Company, 11
Fiber crossection, 167
Fiber database, 168
Fiber optic double condenser, 72
Fibers, high performance, 101
Filament or string GSR morphology, 13
Fillers in vinyl, 203
Fining agents, 23
Fining, 43
Firearm discharge residues, 11
Fireboard, 166
Firebrick stone, 35, 38
Fish egg zirconia, 34
Flames, 15
Forensic case studies, 166
Forensic palynology, 81
Forest fires, 5
Four-fold cyclic twins, 8
Frame grabber, 51
Freshwater algae, 54
Fringe, 43
Fused cast AZS, 39
Gaseous inclusions in glass, 24, 26, 29
Glass defects, 23
Glass, preparation of thin sections, 46
Grain growth, 153
Grain orientation, rolled Al-Li sheet, 155
Grain transport measurements, 152
Grids for TEM calibration, 175
Grog, 43
GSR, 11
Gunshot residue, 11
Halogens, microchemical tests, 107, 116
Hanging drop preps, 207
Hansa Yellows, 195
Herbal teas, 155
HIC, 43
High resolution digital micrographs, 152
History of the microscope, 163
HIT, 43
Honourable Secretary, 173
Hotstage microscopy, 153
Human vision, 99
Humic materials, 86
Hydrocarbons, microchemical test, 113
Iconographic signatures, 130
Inclusions, 156
Industrial crystallization, 156
Infrared and UV tests on paintings, 122
Infrared microspectroscopy, single cells, 158
Insect pollinated plant species, 82
INTER/MICRO-96, *iii* (Vol. 44:2), 147
Kerosene, 16
Ketones, microchemical test, 112
Kevlar, 102
Knit fabric, 17
Knots in glass, 24, 30, 43
Kofler thermomicroscopic data, 143
Last Supper, 127
Lead carbonate, 204
Lead particles, 161
Lead, 11, 203
Leaf fragments, 3
Leitz Aristophot, 60
Leitz Panphot, 59
Leonardo da Vinci painting, 119
Letters to the editor, 57, 213
LIC, 43
Lignins, 5
Liquidus, 43
Louis Pasteur and crystallography, 163
Low magnification brightfield images, 59
Low visibility surfaces, 15

Macroscopy with the SEM, 154
Mad cow disease, 168
Magnesium, 13
Magnification calibration, TEM, 175
Malachite, 155
Manufacturers of microscopes, 54
Marble, limestone, and granite rocks, classification 163
Mass spectrometry, fourier-transform, 159
Mercury fulminate primers, 11
Mercury(I) salts, 7
Mercury(II) salts, 7
Metal squarates, 7
Metallic inclusions in glass, 24, 28
Metallograph, Bausch & Lomb, 151
Metallographic specimens, 59
Metals, microchemical test, 108
Mica, 3
Microchemical bench, 105
Microchemical qualitative analysis, 7
Microchemical reagents, 105
Microchemical test papers, 154
Microchemical tests, 105, 203
Microcompressor, 137
Microcrystal tests, 203
Microscope as a symbol of science, 150
Microscope manufacturers, 54
Microscope stand design, 152
Microspectroscopy, integration with other methods, 158
Molybdenum, 30
Muffle furnace, 203
Mullite brick, 39
Natural fiber collection, 167
Nepheline, 34
Neutral species, microchemical test, 115
Nikon Multiphot, 59
Nitric acids, 8
Nitrogen, microchemical tests, 107, 114
Nodular zirconia, 34
Nomex, 102
Nyclad ammunition, 11
Nylon 11 polymer, 11
Organo-tin compounds, 160
Organic compound thermal data, 143
Organic matter, 1
Organic pigments, 195
Oxygen, microchemical tests, 107
Paint pigments and media, 120, 122, 164
Painting techniques and materials, 164
Paintings, 119
Palynology, 81, 164
Paper, 17
Particle mounting methods, 10
Particle size analysis, 5
Particulate matter, 1
Pavers, 43
PBI fiber, 101, 173
PCBs, 1
Peak resolution calibration, 175
Perchlorates and chlorates, microchemical tests, 165
Pharmaceutical product design and trace analysis, 153
Phenols, microchemical test, 111
Phloroglucinol, 5
Phosphinic acid, 8
Phosphorus, microchemical tests, 108
Photomacrography, 59
Photomicrography, 53
Photons, 99
Pigment characterization, 120
Pigment dating, 120
Pigments, 120, 195
Plant stems, 3
Platinum, 30
PLM/microprobe, 157
Pollen, 81
Polybenzimidazole polymer, 101
Polychlorinated biphenyls, 1
Polymer defects, 156
Polymorph transition of RG 12525, 153
Polypheneylene sulfide fiber, 173
Porcelain, 39
Poster mounting squares, 207
PPS fiber, 173
Precision universal compensator, 159
Primary refractory stones, 25, 43
Problem solving, 157
Pseudo-opaque, 43
Pseudotetragonal, 8
Qualitative analysis, 7
Qualitative organic microanalysis, 105
Quality control checks, TEM, 175
Reboil, 43
Red blood cells, IR of single, 158
Reflected light, 59
Reflected polarized light, 155
Refractomer, automated, 157
Refractory materials, 23, 38, 43
Replicas of surfaces, 15, 18, 58
Resolution, 15
Retina, 99
Rheinberg illumination, 98
River sediments, 1
Robert Franklin Stroud, 151
Sailboat microscopy, 150

Scum, 46
Secondary corundum, 35
Secondary refractory stones, 25, 46
Secondary zircon, 35
Sediment, 1, 160
Seeds in glass, 5, 24, 29, 46
Selected Area Electron Diffraction, 178
SEM macroscopy, 154
SEM, 159
Silica batch agglomerate, 31
Silica batch stone, 30
Silica brick spall, 34
Silica brick, 38
Silicates in soil, dissolution, 87
Silicon, microchemical test, 108
Silicone grease, 20
Sillimanite brick, 38
Slip cast clay, 38
Smoke, 15
SMSI, 57
Snappy Video Snapshot, 51, 158
Snowflake microscopy, 163
Softwood fibers, 167
Soil minerals, 3
Soil pollen analysis, 81
Soil pollen extraction and preparation, 83
Soil size fractionation, 84
Solution sac, 46
Soot enhanced surfaces, 17, 20
Soot, 15
Specimen rotator for the gold sputtercoater, 156
Spew, 35, 46
Spinel, 13
Sputtercoating rotator, 156
Squaric acid, 7
Staining of pollen, 88
State Microscopical Society of Illinois, 57
Statement of ownership, 58
Stones in glass, 25, 46
Stones, common minerals, 48
Strontium, 11
Stroud, Robert Franklin, 151, 181
Style and chronology in Leonardo painting, 123
Sublimation, 195
Sulfur compounds, microchemical test, 116
Sulfur, microchemical test, 108
Surface enhancement, 15
Symmetry in crystals, 151
Tamp, 46
Tattoo pigments, 166
Taylor Microcompressor Mark III, 137
Taylor Microcompressor Mark IIIt, 141
TEM combination calibration grid, 175
Tensile defects in glass, 24
Test papers, 154
Textile fibres, 56
Thermomicroscopy, 143
Thinsections of glass, 46
Tilt series, bulk YBCO bicrystals, 152
Titanium white, 204
Tobacco industry, problem solving, 157
TOC, 2
Toothpaste as sealant, 141
Total organic carbon, 2
Total Reflection X-ray Fluorescence, 158
Trace analysis vs. ultramicroanalysis, 149
Trace analysis, 153
Tricks of the Trade, 10
Tridymite, 31
Trilobal fibers, 155
Tube draw, 46
Tubing, 46
Tuck stones, 46
Tungsten needle, 10
Twinned crystals, 8
UFOs, 167
Ultramicroanalysis vs. trace analysis, 149
Unknowns as teaching aids, 167
Unsymmetrically segmented twins, 8
Upset, 46
Variable Volumetric Counting, 137
Varsol soot, 16
Vertical incident illumination system, 79
Vision, 99
Vitreous inclusions in glass, 24, 27
Volumetric counting chamber, 137
Water, microchemical tests, 107
Water-drop experiments, 152
Wilson Bentley, 163
Window blinds, 203
Wood particles, 3
Woven fabric, 17
Writing sequence problems, 164
X-ray diffractometry, 155
XRF, total reflection, 158
YBCO crystals, 152
Yttrium(III) salts, 7
Zeiss Ultraphot II, 59
Zircon brick and tamp, 39
Zirconia, 24, 34, 39
$ZnCl_2$ solution etching, 85
